

Services & Solutions Offered

Simeio Solutions is the only company to uniquely blend best practices and intellectual property into three lines of business:

Professional Services

- ❖ Sales Assistance (proofs of concept, product demonstrations, etc)
- ❖ Strategy (Assessment, Architecture, IAM roadmap development, etc)
- ❖ Consulting
- ❖ Implementation

Software-as-a-Service

- ❖ Modularized Identity and Access Management services via the 'cloud'

Managed Services

- ❖ Resource and infrastructure management capabilities either on-site or remotely

About us

Simeio's leadership team brings a wealth of expertise combining their experience from Big 4 consulting firms, client organizations, product development and product management.

The company is headquartered in New Jersey, with offices in New York, Los Angeles, Atlanta, Chicago, Australia, UK, Canada and India.

A solution to improve your experience with IAM Governance

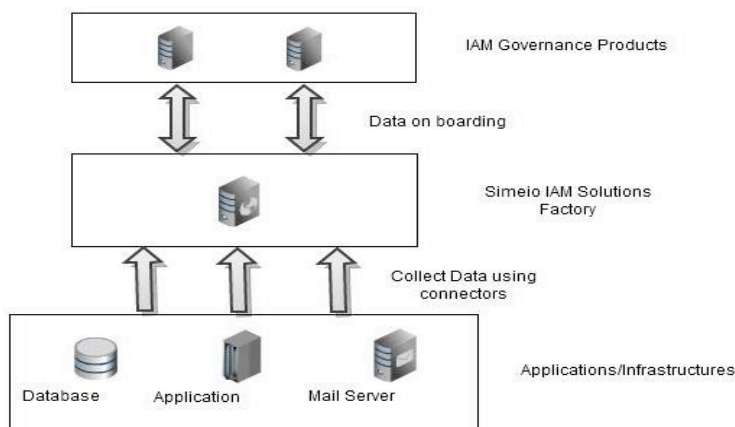

Simeio introduces a one-stop solution for your IAM and Governance Data Management needs. This solution is a collection of best practices and deployable IAM components that can be integrated with industry known Identity Management and Compliance solutions. Bundled with the wide range of utilities and reporting capabilities it aids towards the rapid and efficient deployment of your IAM solution.

An efficient and effective way to collect data for your IAM Governance products

The Simeio IAM Solution Factory helps jump start your data collection efforts by:

- Providing out-of-the-box connectors and transforms for various applications and platforms, allowing for quick on-boarding of data
- Move product configuration data and scripts from one environment to another
- Enabling enhancement of functionality with easy to integrate connectors and transforms with a User Friendly Interface
- Providing rapid deployment with tools to support to propagate your solution from one environment to another (e.g. Development, Test, UAT, Production)
- Allowing scheduling of connectors/transforms to be executed with the built-in scheduler

The solution is bundled with connectors and transforms that work seamlessly with several applications and infrastructures, the IAM Solution Factory.

The benefits can be recognized at every stage of your IAM solution development, from prototype through implementation. Some key benefits include the following:

- Substantial reduction in cost of over 70% usually spent in the design, development and testing phases of connectors and transforms for various target system in an enterprise
- Efficient management of different types of data sets such as user, accounts and glossary
- Ability to configure feed owner for every resource and send them email notifications
- Ships with common policies used by organizations to manage people, applications and data that provide consistency and breadth needed for IAM governance

The following information summarizes the key features and benefits of the IAM Solutions Factory.

Out-of-the-Box Reports

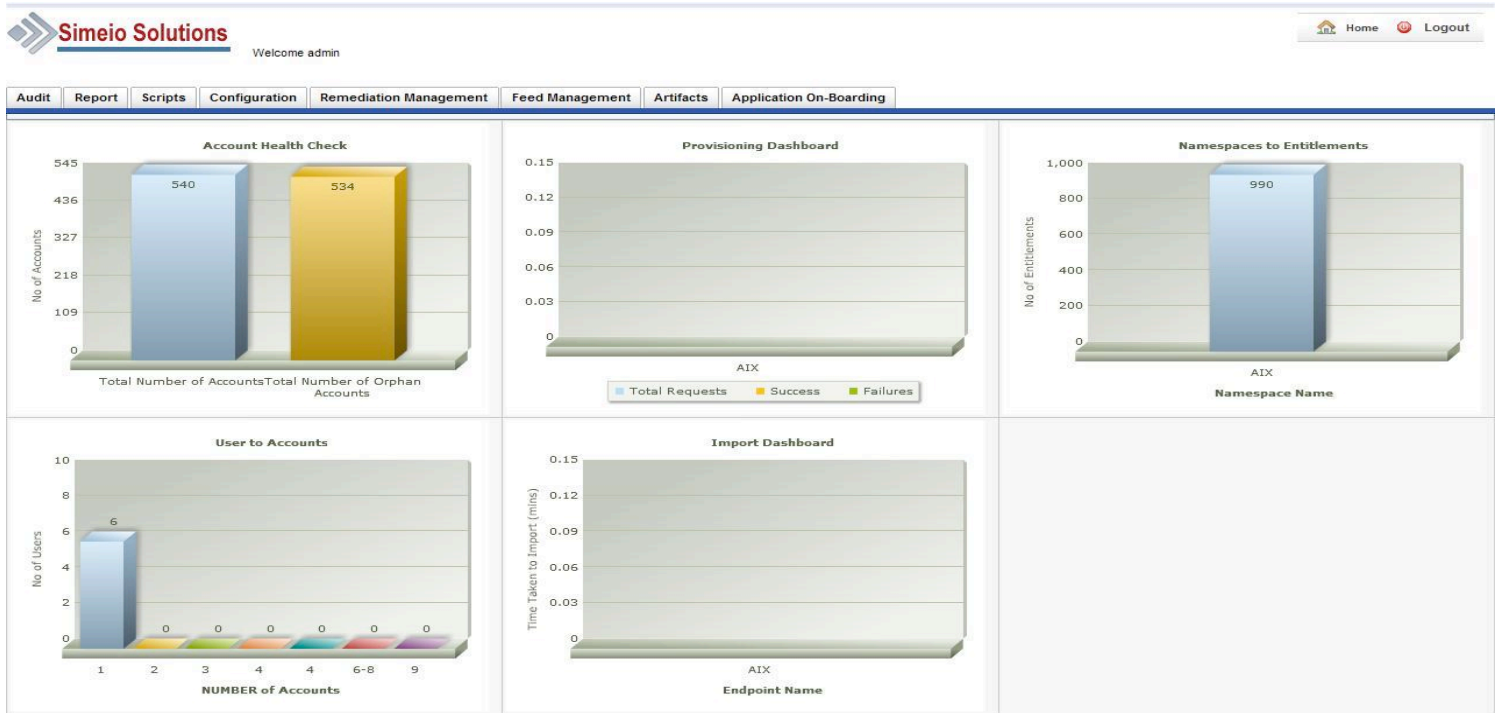

- Preconfigured with up to 48 frequently used reports
- Preconfigured to run Jasper reports

Artifacts

- Serves as a warehouse for project artifacts
- Houses capability to add / update and delete artifacts
- Provides ability to download artifacts
- Provides functionality to segregate artifacts by vendor / project / phase

Dashboard that provides in-depth graphical views, such as:

- Total number of accounts in warehouse
- Total number of orphaned accounts
- Total number of entitlements per resource
- User-to-Accounts ratio

Additional Utilities

Easy interface to configure database connection

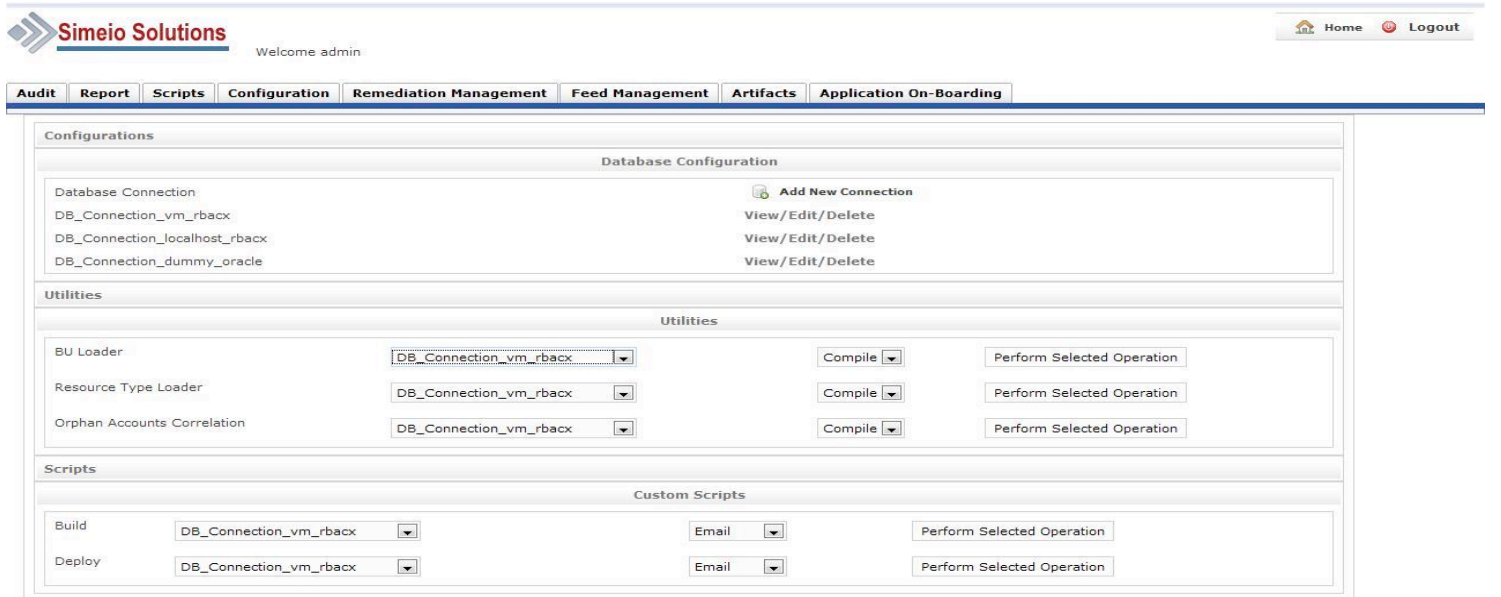

- Provides ability to add / edit database connection
- Supports configuration for multiple database environment
- Supports Oracle, MS SQL, MySQL and DB2 databases

Handy interface to configure utilities and add custom database scripts

- Allows execution of custom scripts / utilities
- Provides ability to download or email the results of custom scripts
- Inbuilt functionality to identify owners for each uploaded custom script

Packaged with standard utilities & frequently used database queries

- Allows execution of these queries on different database environment

Product Architecture

IAM Solutions Factory is a mature and easy to use application built using Grails Web Framework which runs on all major platforms. It's easy to extend and customize according to different business needs. Quick deployment with no major configurations involved.
