Modernized App Onboarding for Secured Digital Transformation Programs

With the increase in digital transformation, the need for modernization and convergence of IAM platforms is increasing. Modernization is not limited to the platform but requires an overhaul of the business processes and approach. This increases the IAM adoption and maturity of the IAM program. Simeio is geared to help support this modernization need through its platform. As a self-service, and cross-service app, it decentralizes the onboarding process while centralizing the visibility to the app owners.
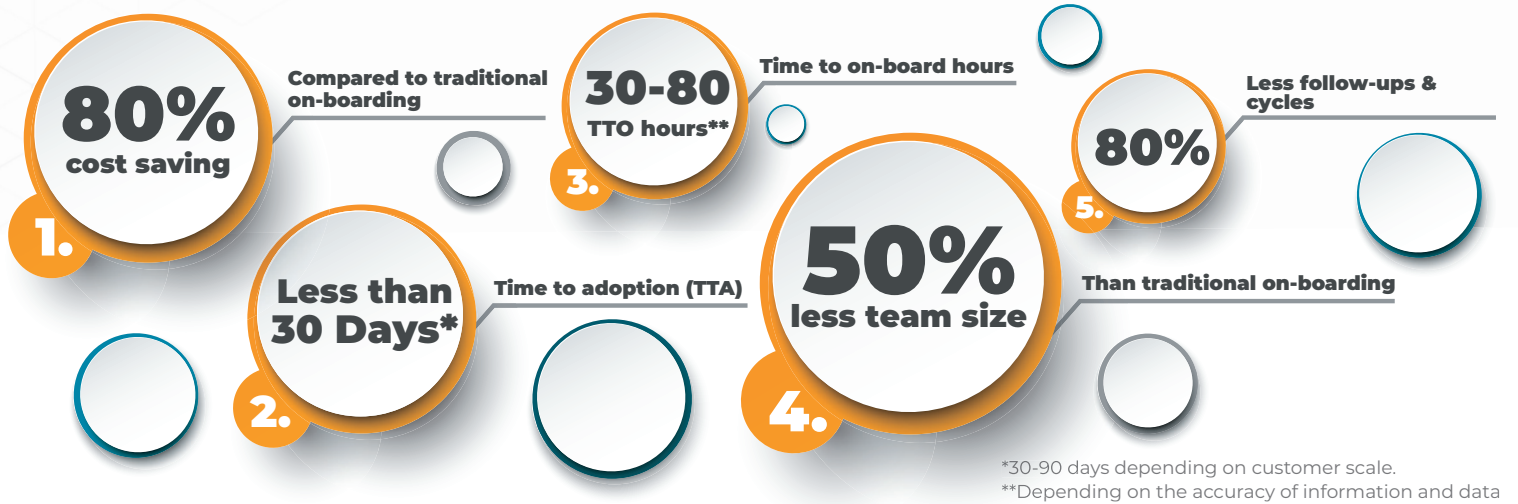

Complete overhaul of business processes & approaches	**Reduction in operational cost** & increase in the ROI of the IAM programs	**Centralized control** w/ visibility into the key success metrics of the IAM solutions	**Increased IAM adoption** w/ improved program maturity

CHANGE THE TRADITIONAL ONBOARDING NARRATIVE

Traditional App Onboarding	VS	Modernized App Onboarding
Highly-skilled heavy resourcing	Resourcing	Distributed ownership and smart platform enabling leaner resourcing
Customized, offline, long cycles	App Onboarding Initiation	Standardized, self-service, online, shorter cycles
Customized, manual, error-prone, long winding	Design, Build & Test	Templatized, automated, error-free, faster
Manual, error prone, long deployment	Deployment	Automated, error-free, secure, deployment.
Repetitive, offline, manual, error-prone change management, increasing the operational cost	App Lifecycle Management	Self-service, online, automated, error-free change management, minimizing operational effort & cost
Independent programs w/ additional cost & effort & no centralized visibility across services	Service Expansion	Self-service, automated service expansion at no additional cost & centralized visibility across services

WHY SIMEIO NEXTGEN ONBOARDING?

» Cross-service, cross-technology app onboarding platform

» Yearly onboarding-as-a-service with upto 10 apps included in the first year

» Unlimited app configuration management

» AM supported for PingFederate & Okta, IGA services supported for Saviynt

» Support for on-prem or SaaS IAM Platforms

» Onboarding for IGA and AM services included

80% cost saving
1.
Compared to traditional on-boarding

30-80 TTO hours**
