Identity Administration (IA) covers the entire lifecycle of the identities in your environment. From the beginning of a relationship with an employee or customer to the end and all the stages in between, you need to be sure that their access and user experience changes as they change.

- Audit findings – User access to resources without approval trails
- Poor user experience
- Time consuming process to grant users access to systems
- Loss of productivity
- Frequent help desk calls

How You’ll Benefit

- Improved User Experience. By enabling automatic logins, they can more easily move from system to system without having to remember multiple logins and passwords.
- Enhanced Security Profiles. IAM systems can authenticate and authorize users based on the access level indicated in their directory profiles. IAM system can also automatically control user access using other factors to specific functions of your system.
- Easy, Portable Access. Allows users to access to all interconnected systems, regardless of where the user is physically located. This can be especially useful for large companies doing business.

An Identity Administration Client Success

“50% reduction in manager’s time to complete certification requests.”

— VANTIV
OUR CONNECT AND PROTECT FOCUS GIVES YOU A COMPLETE RANGE OF CUSTOMIZED SOLUTIONS, PROVEN EFFECTIVE FOR OVER 150 MILLION IDENTITIES. GET #SIMEIOMSAFE

IDENTITY ADMINISTRATION
Simeio can manage your end-to-end identity lifecycle for employees, partners, customers and devices. We’ll handle all account requests, approval workflows, automated provisioning, self-service password resets and access termination.

Business Problems Solved: Faster onboarding and offboarding, better controls, compliance and cost improvements through automating manual processes and automated access termination.

ACCESS MANAGEMENT & FEDERATION
Get peace of mind and much more secure authentication. Simeio can implement a seamless single sign-on (SSO) to any on-premise application or network resource. Enjoy secure access from any device, supporting all federation standards. Educate your business on the risks, all while building your business.

Business Problems Solved: Too many sign-ons, frustrating user experience.

DATA SECURITY & LOSS PREVENTION
Security solutions for all types of databases as a hosted managed service. Set up policies to discover and prevent unwarranted actions on your sensitive content and data in the cloud. Centrally manage and enforce data management policies, alerts, logs and data egress blocking.

Business Problems Solved: Ensuring that private data remains private.

SECURITY & RISK INTELLIGENCE
Deploy and maintain security and behavioral analytics with Simeio. User and entity behavioral analytics can deliver continuous risk monitoring. Sophisticated machine learning algorithms enable real-time detection of breaches and threats.

Business problems solved: Ensuring that people are using their access appropriately.

ACCESS GOVERNANCE
Let Simeio automate compliance and protect your enterprise against threats with solutions for access certifications, segregation of duties enforcement, role management, and identity proofing.

Business Problems Solved: SOX compliance, time-consuming manual access review, reduce audit findings or compliance violations.

PRIVILEGED IDENTITY MANAGEMENT
Now you can securely manage passwords & SSH keys for SaaS and on-premise applications through auto-discovery, privileged checkout, session recording & threat analytics. Simeio will automate compliance reporting with integration to existing access governance & MFA.

Business Problems Solved: Identifying privileged access, reduced risk by improved controls, integration of privileged accounts into governance platform.

CORE DIRECTORY SERVICES
Simeio can help you manage your identities on a global scale, with high performing and flexible virtual directory solutions. Enable secure and seamless access to web and cloud solutions. Full service includes platform integrations, workflow configurations and directory management.

Business Problems Solved: Single view of identity in highly complex environment to enable secure and seamless access to web and cloud solutions, giving right access at any time with any device.

CLOUD SECURITY
Protect critical cloud infrastructure with Simeio Solutions that can detect shadow IT. Automate cloud security admin, including SaaS identity administration and SaaS configuration monitoring. Implement end-to-end control through real-time cloud threat intelligence.

Business problems solved: Reduction in Shadow IT and improved security around employees use of the internet.
