

MONITOR AND PROTECT THOSE WITH THE HIGHEST ACCESS.

The Simeio Difference

Simeio Privileged Identity Management (PIM) is the only way to know that your super user accounts within your organization are truly secure. Simeio PIM automates compliance reporting with integration to existing access governance and multi-factor authentication infrastructure. Your privileged users know a lot about your company... but with Simeio PIM, you'll know even more.

You get the latest, best-in-class PIM technologies with reliable 24/7 monitoring and support – with no hardware or capital investments, lengthy integrations, migrations or upgrades required. We'll address serious and rapidly changing security threats while minimizing the impact on your organization, employees and customers.

Simeio Professional Services

Our Advisory Services team enables our customers to quickly launch or expand their IAM Programs, achieving on average a 60% faster time-to-market than traditional IAM implementations.

Free PIM Assessment

Assess your Privileged Identity Management Program with a complimentary quick-start assessment workshop delivered by our subject matter experts.

We use industry-forged consultative processes and leverage our Simeio-defined best practices to assess the scope of your Privileged Identity Management Program. This can help you to prioritize initiatives and educate your business on how to best retain compliance and security, while keeping your organization out of the news for the wrong reasons.

SIMEIO FAST FACTS

- 150,000,000+ global identities managed
- We focus solely on Identity & Access Management
- Established 2008

Why You Need It

Privileged Identity Management (PIM) is the monitoring and protection of privileged (super user) accounts in an organization's IT environment, which are the most common targets of attack.

PIM is a holistic set of technologies and processes designed to create, modify, control access to and terminate privileged access.

Oversight is necessary so that the greater access abilities of super user accounts are not misused or abused.

How You'll Benefit

- **Risk Reduction:** Protect sensitive access to critical devices and systems where users may leak confidential information, change transactions and remove audit trail.
- **Policy Improvement:** Enable continuous and sustainable policy enforcement over administrative and root accounts across the organization, ensuring established business and security policies are continuously followed.
- **Compliance Alignment:** Detect, monitor and report on privileged account activity, improving the audit process and meeting compliance guidelines.
- **Visibility Improvement:** Identify and monitor both privileged accounts and their usage.

A PIM Client Success

“User on-boarding and off-boarding efficiency gain by 95%”

– ASURION

OUR CONNECT AND PROTECT FOCUS GIVES YOU A COMPLETE RANGE OF CUSTOMIZED SOLUTIONS, PROVEN EFFECTIVE FOR OVER 150 MILLION IDENTITIES. GET #SIMEIOSAFE

IDENTITY ADMINISTRATION

Simeio can manage your end-to-end identity lifecycle for employees, partners, customers and devices. We'll handle all account requests, approval workflows, automated provisioning, self-service password resets and access termination.

Business Problems Solved: Faster onboarding and offboarding, better controls, compliance and cost improvements through automating manual processes and automated access termination.

ACCESS MANAGEMENT & FEDERATION

Get peace of mind and much more secure authentication. Simeio can implement a seamless single sign-on (SSO) to any on-premise application or network resource. Enjoy secure access from any device, supporting all federation standards. Educate your business on the risks, all while building your business.

Business Problems Solved: Too many sign-ons, frustrating user experience.

DATA SECURITY & LOSS PREVENTION

Security solutions for all types of databases as a hosted managed service. Set up policies to discover and prevent unwarranted actions on your sensitive content and data in the cloud. Centrally manage and enforce data management policies, alerts, logs and data egress blocking.

Business problems solved: Ensuring that private data remains private.

SECURITY & RISK INTELLIGENCE

Deploy and maintain security and behavioral analytics with Simeio. User and entity behavioral analytics can deliver continuous risk monitoring. Sophisticated machine learning algorithms enable real-time detection of breaches and threats.

Business problems solved: Ensuring that people are using their access appropriately.

ACCESS GOVERNANCE

Let Simeio automate compliance and protect your enterprise against threats with solutions for access certifications, segregation of duties enforcement, role management, and identity proofing.

Business Problems Solved: SOX compliance, time-consuming manual access review, reduce audit findings or compliance violations.

PRIVILEGED IDENTITY MANAGEMENT

Now you can securely manage passwords & SSH keys for SaaS and on-premise applications through auto-discovery, privileged checkout, session recording & threat analytics. Simeio will automate compliance reporting with integration to existing access governance & MFA.

Business Problems Solved: Identifying privileged access, reduced risk by improved controls, integration of privileged accounts into governance platform.

CORE DIRECTORY SERVICES

Simeio can help you manage your identities on a global scale, with high performing and flexible virtual directory solutions. Enable secure and seamless access to web and cloud solutions. Full service includes platform integrations, workflow configurations and directory management.

Business Problems Solved: Single view of identity in highly complex environment to enable secure and seamless access to web and cloud solutions, giving right access at any time with any device.

CLOUD SECURITY

Protect critical cloud infrastructure with Simeio Solutions that can detect shadow IT. Automate cloud security admin, including SaaS identity administration and SaaS configuration monitoring. Implement end-to-end control through real-time cloud threat intelligence.

Business problems solved: Reduction in Shadow IT and improved security around employees use of the internet.
