**Privileged Identity Management**

**SIMEIO FAST FACTS**
- 150,000,000+ global identities managed
- We focus solely on Identity & Access Management
- Established 2008

**Why You Need It**

**Privileged Identity Management (PIM)** is the monitoring and protection of privileged (super user) accounts in an organization’s IT environment, which are the most common targets of attack.

PIM is a holistic set of technologies and processes designed to create, modify, control access to and terminate privileged access. Oversight is necessary so that the greater access abilities of super user accounts are not misused or abused.

**How You’ll Benefit**

- **Risk Reduction**: Protect sensitive access to critical devices and systems where users may leak confidential information, change transactions and remove audit trail.
- **Policy Improvement**: Enable continuous and sustainable policy enforcement over administrative and root accounts across the organization, ensuring established business and security policies are continuously followed.
- **Compliance Alignment**: Detect, monitor and report on privileged account activity, improving the audit process and meeting compliance guidelines.
- **Visibility Improvement**: Identify and monitor both privileged accounts and their usage.

**A PIM Client Success**

“User on-boarding and off-boarding efficiency gain by 95%”

— ASURION
OUR CONNECT AND PROTECT FOCUS GIVES YOU A COMPLETE RANGE OF CUSTOMIZED SOLUTIONS, PROVEN EFFECTIVE FOR OVER 150 MILLION IDENTITIES. GET #SIMEIOTOSAFE

**IDENTITY ADMINISTRATION**
Simeio can manage your end-to-end identity lifecycle for employees, partners, customers and devices. We'll handle all account requests, approval workflows, automated provisioning, self-service password resets and access termination.

**Business Problems Solved:** Faster onboarding and offboarding, better controls, compliance and cost improvements through automating manual processes and automated access termination.

**ACCESS GOVERNANCE**
Let Simeio automate compliance and protect your enterprise against threats with solutions for access certifications, segregation of duties enforcement, role management, and identity proofing.

**Business Problems Solved:** SOX compliance, time-consuming manual access review, reduce audit findings or compliance violations.

**ACCESS MANAGEMENT & FEDERATION**
Get peace of mind and much more secure authentication. Simeio can implement a seamless single sign-on (SSO) to any on-premise application or network resource. Enjoy secure access from any device, supporting all federation standards. Educate your business on the risks, all while building your business.

**Business Problems Solved:** Too many sign-ons, frustrating user experience.

**PRIVILEGED IDENTITY MANAGEMENT**
Now you can securely manage passwords & SSH keys for SaaS and on-premise applications through auto-discovery, privileged checkout, session recording & threat analytics. Simeio will automate compliance reporting with integration to existing access governance & MFA.

**Business Problems Solved:** Identifying privileged access, reduced risk by improved controls, integration of privileged accounts into governance platform.

**DATA SECURITY & LOSS PREVENTION**
Security solutions for all types of databases as a hosted managed service. Set up policies to discover and prevent unwarranted actions on your sensitive content and data in the cloud. Centrally manage and enforce data management policies, alerts, logs and data egress blocking.

**Business Problems Solved:** Ensuring that private data remains private.

**CORE DIRECTORY SERVICES**
Simeio can help you manage your identities on a global scale, with high performing and flexible virtual directory solutions. Enable secure and seamless access to web and cloud solutions. Full service includes platform integrations, workflow configurations and directory management.

**Business Problems Solved:** Single view of identity in highly complex environment to enable secure and seamless access to web and cloud solutions, giving right access at any time with any device.

**SECURITY & RISK INTELLIGENCE**
Deploy and maintain security and behavioral analytics with Simeio. User and entity behavioral analytics can deliver continuous risk monitoring. Sophisticated machine learning algorithms enable real-time detection of breaches and threats.

**Business Problems Solved:** Ensuring that people are using their access appropriately.

**CLOUD SECURITY**
Protect critical cloud infrastructure with Simeio Solutions that can detect shadow IT. Automate cloud security admin, including SaaS identity administration and SaaS configuration monitoring. Implement end-to-end control through real-time cloud threat intelligence.

**Business Problems Solved:** Reduction in Shadow IT and improved security around employees use of the internet.
